

Project Portfolio

Self-Projects (Own Applications)

1. Doc Care

Doc Care is a **mobile-based doctor appointment booking system** that eliminates the need for patients to visit clinics or make phone calls for scheduling appointments. The system allows users to book appointments through their smartphones, providing real-time updates on doctor availability. It also ensures that patients are notified in case of schedule changes, reducing waiting times and unnecessary travel. Additionally, doctors can efficiently manage their daily schedules and check their appointments from anywhere, improving communication and productivity.

2. Sarvatra Vijay

Sarvatra Vijay is an **informational and recruitment assistance application** for individuals aspiring to join the **Indian Armed Forces (Army, Navy, and Air Force)**. The app provides complete guidance on recruitment procedures, exam syllabi, important dates, and official resources to help candidates make informed career decisions. Additionally, it offers **job alerts, defense-related current affairs, and online resources** for SSC & HSC candidates preparing for entrance examinations. The platform serves as a **one-stop solution for Indian defense aspirants**, streamlining access to crucial information.

Company-Based Projects

Enterprise Solutions & Productivity Applications

3. AttendXPro (AXP)

AttendXPro (AXP) is an **Android-based attendance system** designed for smart, touchless attendance tracking using **face recognition technology**. It eliminates the traditional paper-based or biometric attendance methods, providing a **seamless, time-efficient, and secure** way for employees to mark attendance simply by scanning their faces. The system also integrates **geo-**

location tracking and real-time timestamping to ensure accurate attendance records. AXP improves productivity, enhances security, and offers **detailed attendance analytics** for organizations, making workforce management more efficient.

4. PulseFood

PulseFood is an **online food ordering platform** specifically designed for cafeterias and food courts in corporate environments. The app enables employees to order food from their **offices or workstations**, reducing wait times and enhancing convenience. Additionally, PulseFood allows users to filter menu options based on **dietary preferences and meal plans**, catering to **individual nutritional needs**. The app provides **real-time order tracking, digital payments, and order history**, streamlining food service operations in large-scale workspaces.

5. PulseXPro (PXP)

PulseXPro (PXP) is a **proprietary technology solution** developed to manage **non-clinical healthcare support services** efficiently. The application streamlines administrative processes in healthcare facilities, ensuring that various operational tasks such as **facility management, patient support, and logistics coordination** are handled seamlessly. With PXP, healthcare institutions can **enhance service quality, optimize resources, and improve workflow efficiency**, ultimately leading to better patient experiences.

6. UnitXPro (UXP)

UnitXPro (UXP) is a **business process management tool** designed to help organizations efficiently **handle tasks, manage requests, monitor performances, and send notifications**. The app allows users to track and update their tasks in real time, ensuring **seamless coordination between teams**. It also includes a **contact center for communication**, periodic task reminders, and an announcement system for company-wide updates. The mini version, **UnitXPro Lite**, offers essential features in a lightweight package for smaller teams and departments.

7. MyJourney

MyJourney is a **crew mobilization and demobilization management solution** designed for **offshore industries such as oil & gas, marine construction, and marine exploration**. The app helps crew members stay compliant with **industry norms and company-defined travel protocols** during their journeys to and from offshore locations. It provides **daily activity tracking, progress monitoring, and real-time alerts** in case of missed regulations. By ensuring that crew members meet all compliance requirements before reaching their assignments, MyJourney enhances safety and efficiency in offshore operations.

Banking & Payment Solutions

8. Yono Payment

Yono Payment is a **banking and financial transaction app** that enables users to make payments through **ARM (card swap) and handheld devices**. The app provides features such as **EMI payments, quick payments, settlements, and secure card transactions**. It offers bank-wise payment management, ensuring streamlined transactions for users and businesses. By integrating various banking solutions in one platform, Yono Payment enhances **payment security, user convenience, and financial tracking**.

9. SBI Fast

SBI Fast is a **mobile application for banking field operations**, designed to track and manage transactions in assigned locations. The app allows banking agents to create service tickets for **on-site transactions**, track their activities, and submit daily reports. By offering real-time tracking and data submission, SBI Fast ensures **better planning, operational efficiency, and streamlined financial services**.

10. FA Tracker (Hitachi Payment Services Private Limited)

FA Tracker is an **internal asset-tracking application** developed for **Hitachi Payment Services employees, consultants, vendors, and contractors**. The application helps monitor **fixed assets across India**, ensuring efficient **inventory management, tracking, and auditing**. Only

authorized users with valid credentials can access the app, maintaining a high level of security for asset information. FA Tracker improves **transparency, reduces asset misplacement, and enhances operational efficiency.**

11. ApnaATM

ApnaATM is a **real-time ATM monitoring application** developed for **White Label ATM franchise owners and Master Franchisees**. The app allows franchisees to **track ATM transactions, monitor performance, and log service requests** with Hitachi Help Desk in case of downtime. Additionally, it offers a **TDS reconciliation system**, enabling users to upload bank statements and generate reconciliation certificates instantly. By providing complete visibility into ATM operations, ApnaATM enhances **business efficiency and issue resolution.**

Previous Projects (Other Companies)

12. Cosmic Vision (Dubai Client)

Cosmic Vision is an **online puja booking platform** that connects users with priests for religious ceremonies such as **Satyanarayana Puja, Mahalaxmi Puja, Home Hawan, and Gruha Puja**. The app provides a convenient way for users to **schedule religious services online** without physically visiting temples or contacting priests manually.

13. DHFL BMO (Board Meeting Management)

DHFL BMO is a **secure board meeting management system** designed exclusively for **DHFL board members**. The app allows members to **participate in upcoming and archived meetings**, view meeting locations on integrated maps, and access **real-time meeting agendas and descriptions**. The app supports **split-view functionality**, optimized for tablet devices.

14. I Love London (Travel Assistant)

I Love London is a **tourist guide and itinerary planning application** designed for visitors in London. The app offers features such as **show ticket booking, weather updates, local attractions, and personalized itinerary creation**. It serves as a **digital travel assistant**, enhancing the overall experience for tourists.

15. Chikaku (E-commerce Platform)

Chikaku is a **location-based e-commerce solution** that connects local brick-and-mortar stores with nearby buyers. The platform enables merchants to **advertise promotions and deals**, allowing consumers to access **discounted products from local stores**. Chikaku includes two separate apps: one for buyers and one for merchants, ensuring a seamless **online-to-offline shopping experience**.

16. TTMM (Track The Money Manager) (Expense Tracker)

TTMM is an **expense tracking and bill-splitting mobile application** that allows users to **track shared expenses within a group**. The app keeps a record of who owes money to whom, ensuring **transparency and hassle-free financial management** among friends, roommates, or colleagues.

17. ICICI Direct Markets App: The ICICI Direct Markets App is a comprehensive platform that enables users to invest and trade across various financial instruments, including stocks, futures & options, commodities, and currencies. It offers real-time market data, advanced charting tools, and personalized watchlists to enhance the trading experience. Users can also access research reports, track their portfolios, and receive instant notifications about market movements. The app's user-friendly interface ensures seamless navigation, making it suitable for both novice and experienced investors.

18. Bank of Baroda M-Invest App: The Baroda M-Invest App is a digital platform designed to facilitate investments in mutual funds. Customers can effortlessly invest in partner mutual funds of Bank of Baroda through a completely digital process. The app allows users to track the growth of their investments, view portfolio details, and access various mutual fund schemes. Its intuitive

design ensures that users can manage their investments efficiently, making the process of wealth creation more accessible.

19. BlinkTrade Pro Mobile App: BlinkTrade Pro is an online intraday trading platform developed by JM Financial Services. It offers a powerful mix of trading tools and real-time market data to redefine the trading experience. The app features a powerful derivative and stock scanner with preloaded filters spanning fundamentals, technicals, ratios, and more, customized for stocks, futures, and options. Its user-friendly interface and advanced features make it suitable for both beginners and seasoned traders.

20. BlinkTrade Web App: The BlinkTrade Web App is a high-speed trading platform accessible via web browsers, catering to the diverse needs of investors. Equipped with the latest features and tools, it serves as an ideal trading portal for all profiles of investors. The platform allows clients to identify lucrative trading opportunities and make informed investment decisions. With lightning-fast order placement across equity, derivatives, and currency segments, BlinkTrade ensures that users can achieve their trading or investment goals efficiently.

21. M-Tezz App from Mahindra Finance: The M-Tezz App is a digital platform developed by Mahindra Finance to provide customers with quick and easy access to financial services. While specific details about the app's features are limited, Mahindra Finance is primarily engaged in vehicle financing, offering services such as loans for new and pre-owned vehicles, utility vehicles, tractors, passenger cars, and commercial vehicles. The app likely facilitates loan applications, account management, and provides information on various financial products offered by Mahindra Finance.

These applications demonstrate the integration of technology in the financial sector, aiming to provide users with efficient, user-friendly, and comprehensive financial services at their fingertips.
